

Hand-washing is a great way to keep your bandana looking its best! But... c'mon.. who **really** has the time to hand-wash anything these days?

We sure don't.. so, here are some helpful tips for machine washing your 'dana!

Tip 1

use cold water instead of hot - this will help preserve the shape and color

Tip 2

use a "gentle" or "delicate" cycle

Tip 3

use a mild detergent (ensure it is non-toxic for your fur baby!)

Tip 4

avoid using fabric softeners and bleach

## Tip 5

use a mesh bag to protect the bandana from getting snagged and stretched

## Tip 6

lay out the bandana flat and air dry to preserve its shape

## Tip 7

once dried, you can use an iron to remove any wrinkles with your iron's cotton setting

(be careful around any vinyl designs, buttons, or vegan leather tags!)

And Voila!

If you've followed these tips, your bandana should be back to looking new. We design our bandanas to be durable, but taking proper care of them will help ensure your pup is always looking as cute as can be!
